

G DHANESHWARAN

Java Developer (Fresher) | Core Java · Spring Boot · REST APIs · MySQL

9360529950 | dhaneshwarang@gmail.com | Pondicherry, India (open to relocation across India)

[linkedin.com/in/dhaneshwaran-g](https://www.linkedin.com/in/dhaneshwaran-g) | github.com/DhaneshwaranG | <https://dhaneshwarang.github.io/Portfolio/>

PROFESSIONAL SUMMARY

B.Tech Mechatronics Engineering graduate (2025) and fresher Java developer who has built three Spring Boot + MySQL applications, including a JWT-secured full-stack ordering platform deployed live. Hands-on with REST API design, JPA/Hibernate persistence, layered MVC architecture, SDLC/Agile practices and root-cause debugging. Completed Java Full Stack training at FITA Academy. Seeking a Java Developer trainee role where I can build on my fundamentals through structured training and deliver clean, working code in a client-delivery team.

TECHNICAL SKILLS

Languages: Java (Core Java, OOP), SQL, JavaScript, HTML, CSS

Java & Backend: Spring Boot, Spring Security, JWT, JPA/Hibernate, REST APIs, JSON, MVC (Controller–Service–Repository)

Database: MySQL, SQL queries, normalized schema design

Frontend (supporting): React.js, Angular, Bootstrap

Tools & Practices: Git/GitHub, Docker, Postman, SDLC, Agile/Scrum, requirements analysis, debugging & troubleshooting

PROJECTS

Restaurant Management System

Java · Spring Boot · Spring Security · JWT · JPA/Hibernate · MySQL · React · Docker

- Built secured REST APIs in Spring Boot with JWT authentication (Spring Security) covering user login, category management and menu management.
- Implemented the full order lifecycle (cart, order placement, order-status tracking, order history) persisted in MySQL via JPA/Hibernate.
- Built an admin dashboard with revenue analytics in React (Axios, React Router) consuming the REST APIs.
- Containerized with Docker and deployed live on Vercel; debugged environment-configuration issues. Developed in Agile/Scrum iterations.
- Links: <https://github.com/DhaneshwaranG/Restaurant-Management-System.git>

I-Bot – Automated Invoice Processing

Java · Spring Boot · MySQL · Angular · UiPath

- Built Spring Boot REST APIs (CRUD) with MySQL persistence, storing 1,000+ invoice records fed by a UiPath bot that extracts data from invoice images.
- Automated the end-to-end invoice data-entry workflow, cutting manual effort by 70%+ (processing time from hours to minutes).
- Developed an Angular UI with searchable, paginated, data-driven views.
- Debugged and resolved integration issues across the bot → API → database pipeline using root-cause analysis.
- Links: <https://github.com/DhaneshwaranG/I-Bot-project.git>

MedLabs Pro – Lab Test Appointment & Report Management

Java · Spring Boot · MySQL · JavaScript · Bootstrap

- Developing an online lab-test booking and report system using layered MVC (Controller/Service/Repository) to replace manual scheduling.
- Designing a normalized MySQL schema and RESTful APIs; implementing automated PDF report generation.
- Links: <https://github.com/DhaneshwaranG/MedLabsPro.git>

EXPERIENCE

Web Development Intern – CodSoft

Nov 2023 – Dec 2023

- Built 3+ responsive web applications in HTML, CSS and JavaScript; integrated third-party REST APIs using the Fetch API and debugged cross-browser issues.
- Applied mobile-first design and lazy loading, improving page-load responsiveness by 25%.

Graphic Design Intern – Bonjour Pondicherry

Jun 2025 – Aug 2025

- Designed 20+ social media creatives and promotional materials, delivered to deadline.

EDUCATION

B.Tech, Mechatronics Engineering – Sri Manakula Vinayagar Engineering College, Pondicherry

2021 – 2025 | CGPA 7.45/10

HSC 67% | SSLC 56% – Don Bosco Matriculation Hr. Sec. School, Pondicherry

CERTIFICATIONS

- Java Full Stack Development – FITA Academy (2025–2026)
- UiPath Automation Explorer – ICT Academy (2024)
- Job Simulations (Forage, 2026): Tata Data Analytics; Tata Cybersecurity Security Analyst
