PROFESSIONAL SUMMARY

B.Tech Mechatronics Engineering graduate and fresher Java Developer with hands-on project experience building REST APIs using Java, Spring Boot, and object-oriented design, backed by MySQL practices. Delivered production-style features across a robotic invoice-processing system and a full-stack booking platform, including CRUD APIs, debugging and troubleshooting, and clean, scalable coding standards. Currently completing a Java Full Stack Development program. Seeking to bring strong Java fundamentals, OOP, API design, and a problem-solving mindset to the Java Developer – Fresher.

KEY SKILLS

Programming & OOP: Java, Object-Oriented Programming (OOP), JavaScript, SQL, Data Structures fundamentals

API Design & Integration: REST APIs, Spring Boot, Spring Security, JWT, MVC architecture, Postman

Frontend: Angular, React.js, HTML, CSS, Bootstrap, React Router

Database: MySQL, JPA/Hibernate

PROJECTS

I-Bot – Robotic Automatic Invoice Processing System | Java, Spring Boot, UiPath, MySQL

- Designed and developed scalable REST APIs (Java, Spring Boot, OOP principles) for invoice CRUD operations integrated with MySQL, reliably storing 1,000+ records.
- Engineered an end-to-end RPA automation workflow (UiPath) to extract structured data from invoice images, applying analytical problem-solving to reduce manual data-entry effort by over 70%.
- Built a responsive Angular frontend with searchable, paginated data views; debugged and resolved integration issues across the automation-to-database pipeline.
- Delivered full-cycle automation from image ingestion to database storage, cutting processing time from hours to minutes and improving data accuracy to near 100%.

Restaurant Management System | React, Spring Boot, Spring Security, JWT, MySQL

- Built a full-stack platform with JWT-based authentication and Spring Security, covering user registration/login, category management, and menu management via Java REST APIs.
- Developed cart and order-placement functionality with order history and order-status tracking, backed by a MySQL database via JPA/Hibernate and Spring Boot REST APIs.
- Applied Agile/Scrum practices during iterative development; built an admin dashboard with revenue analytics using a React frontend (Axios, React Router).
- Containerized the application with Docker and deployed it live (Vercel); debugged deployment and environment-configuration issues; source available on GitHub.

MedLabs Pro – Lab Test Appointment & Report Management System | Java, Spring Boot, MySQL, HTML, CSS, JS, Bootstrap

- Applying requirements analysis and OOP-based software design to build a full-stack web application for online lab test booking, eliminating manual scheduling and walk-in queues.
- Building a Java Spring Boot backend with RESTful APIs and a normalized MySQL schema, applying Service/Repository layers and MVC architecture.
- Building a responsive, mobile-first multi-page frontend (HTML, CSS, JavaScript, Bootstrap); implementing automated PDF report generation to reduce turnaround time.

WORK EXPERIENCE

Web Development Intern | CodSoft

Nov 2023 – Dec 2023

- Built 3+ responsive web applications (HTML, CSS, JavaScript) using reusable component structures, reducing code duplication by ~30%.
- Integrated third-party REST APIs using asynchronous JavaScript (Fetch API), improving real-time data rendering and user experience; debugged cross-browser issues.
- Applied UI/UX and quality best practices (mobile-first design, lazy loading), improving page-load responsiveness by 25% across devices.

- Designed 20+ social media creatives and promotional materials, collaborating in an Agile team to deliver assets within sprint deadlines.

EDUCATION

B.Tech, Mechatronics Engineering — CGPA 7.45/10 | Sri Manakula Vinayagar Engineering College, Pondicherry | 2021 – 2025
HSC — 67% | Don Bosco Matriculation Hr. Sec. School, Pondicherry | 2020 – 2021
SSLC — 56% | Don Bosco Matriculation Hr. Sec. School, Pondicherry | 2018 – 2019

CERTIFICATIONS

- Java Full Stack Development — FITA Academy, 2025–2026
- UiPath Automation Explorer — ICT Academy, 2024
- Forage Job Simulations: Tata Data Analytics — 2026
- Tata Cybersecurity Security Analyst — 2026

SOFT SKILLS

Problem Solving • Analytical Thinking • Debugging & Troubleshooting • Communication • Team Collaboration • Time Management • Adaptability
